D1:EP 1298555 A1(NEC Corporation)2003.04.02

The subject matter of claims 1-12 is novel and considered to involve an inventive step over D1. The reason is as follows.

D1 discloses environment information simulation system. It calculates the quantities of harmful substance contained in a product by referring a parts list constituting the product.

But the process of generating list information indicative of a list of names of usable materials for the component classification corresponding to the designed component, which is employed in the subject matter of claims 1-12, is not disclosed in D1.
